

SANJAY TEA COMPANY

BUSINESS PROFILE

About us :

Sanjay Tea Company established in the year 1973, is synonymous with the finest tea blenders and packagers in the industry. We work with the resolution that our reputation must be solely based on the quality of our tea. We maintain commitment to quality.

We provide excellent value added quality tea to our esteemed clients. With a combination of outstanding service to our business associates and value for money products to our clients, we have rapidly gained faith of a chain of highly supportive business channel partners and satisfied clients, enabling our business to grow and flourish. We take pride in our ability to meet client's needs to their utmost satisfaction, however diverse they may be.

We focus on blending high quality, strong and flavoured tea. With factors such as weather, altitude, moisture, soil and season each contributing to a tea's characteristics, the importance of the blender's art is inestimable.

The followings are some of the highlights that set us apart in the market:

Experience

The key management personal is in the field of trading tea for about four decades. With the time, we have mastered each and every aspect of our business. We have been able to acquire an in-depth knowledge to identify the exact demand of the valued clients. Passionate about what we do, and how we do it, we have acquired the sort of knowledge and expertise which we believe is second to none.

Quality Management

Our products and services are available with an assurance of high quality and standard. Every single leaf of our tea undergoes stringent quality control testing to ensure that no substandard product reaches in the hands of the valued clients.

Services at Sanjay Tea Company

We offer end-to-end solution of Tea Packaging. We offer excellent Tea Packaging Services, as we understand that packaging aspect is equally important to the blending aspect in the trade of tea. We are well equipped with all kinds of resources to offer high quality Tea Packaging services. So clients desiring to get supreme quality tea packed in their own brand name in accordance with their own specification need to wait no more.

At Sanjay Tea Company, experts select teas from different tea estates to find the precise leaves, which, when blended together, will produce the exact flavour for a particular blend, and then it goes to our packing unit for packaging in different quantities keeping in mind the needs and preferences of our clients.

Clients can opt according to their choice for the quantity of packaging unit right from 25 grams per unit to 3 kilograms per unit. The packaging unit may be in form of pouches, boxes or jar. The further detail follows.

The criteria to know the quality and specialty of any Tea are their exclusive taste, color and aroma. Therefore proper preservation is a prerequisite, which can be attained only by our latest quality packaging solutions which not only preserve the product but also increments the brand equity of the product. Tea pouches is one of the best remedy for its preservation. These Pouches are very eye catching and can be easily designed in accordance with clients specification for carrying 25 gms to 1000 gms of tea. These pouches are vacuum packed to keep the product quality intact.

These boxes are beautifully crafted according to clients specifications to enhance the aesthetic appearance. Further, these boxes are moisture resistant and provided in varied specifications to safely store the required amount of tea . These boxes contain pouches, which are vacuum packed to keep the quality intact. In addition to this, tea boxes are carefully packaged to avoid any sort of spoilage. These boxes retain different flavors as well as tastes of tea leaves.

These tight sealed and moisture proof containers are available in various capacities, colors and attractive designs It helps in keeping the flavor, color and aroma of tea and provides perfect barriers against dampness, dust particles and other contaminants. We offer these Teas packing in various sizes from 250 gm to 3500 gms, these are very effective for the packing and to meet the required demand of the clients.
